

## SEP Software to Sponsor SUSECON 2016 Global Conference

**Boulder, CO – October 17, 2016** – [SEP Software](#), a vendor of platform-independent, hybrid backup and disaster recovery solutions for unified data protection, announced it will be a sponsor of the Annual SUSECON Global Conference, the premier global open source conference for SUSE customers, partners and community. The conference will be held November 7-11, 2016 at the Washington Marriott Wardman Park in Washington D.C. SEP will be showcasing their backup and disaster recovery solution at booth #509, as well as hosting a 30-minute session demonstrating SEP's integration with and solutions for SUSE SLES and SAP HANA. The speaking session will take place on Wednesday, November 9 at 11:15 am in the Virginia B Conference Room of the Marriott.

SEP delivers feature rich backup and disaster recovery solutions for SUSE Linux Operating Systems. The SEP for SUSE Linux Enterprise Server data protection solution is SUSE certified as of version 7, released in 2001. SEP offers SUSE users high performance backups and fast data recovery capabilities. SEP can be utilized for IBM Linux One, IBM PowerPC, Fujitsu Server and Lenovo Server. SEP Hybrid Backup is certified for SAP4HANA on Linux on IBM Power System and all Linux on x86 Hardware, e.g. Lenovo, Fujitsu, etc. SEP is a cost effective, scalable and reliable backup and recovery solution for SAP HANA, and SUSE Linux Enterprise Server (SLES®) is the recommended and supported OS for SAP HANA.

“We are excited about showcasing the benefits of our product to the SUSE community in Washington D.C. this year,” said Tim Wagner, President of SEP Software. “As a long-term partner of SUSE, we are looking forward to interacting with the SUSE community on such a large scale. We are also excited to showcase our solution and integration with both SUSE and SAP environments where we were one of the first backup vendors who supported the SAP HANA environment. SEP is proud to support the SUSE organization and contribute to the discussion.”

### About SUSECON

SUSECON is the premier global open source conference for SUSE customers, partners and community enthusiasts to come together to learn, to network and to meet SUSE engineers, product managers and executives. Attendees learn about the latest developments in enterprise-class Linux, OpenStack, storage, container and other open source projects from technical experts, ecosystem partners and their peers from around the world. SUSECON is consistently praised by SUSE customers, partners, press and analysts as an outstanding technical conference focused on the needs of the enterprise IT consumer. More information about the event can be found at [www.susecon.com](http://www.susecon.com).

### About SEP Software

SEP Software offers a single backup and disaster recovery solution for environments of any size. SEP solution uses its multi-streaming technology to facilitate unlimited simultaneous data streams to provide some of the highest performance in the backup market. SEP is cross-platform, multi-OS, and supports every popular database and Groupware solution available. Exceptional remote management capabilities allow users to easily and efficiently manage thousands of locations around the globe from one central location. SEP specializes in replacing multiple backup software products with one standardized solution for every environment.
